

Hello World e4 Application – Part 4

Adding Actions to the Part

Adding Actions to the Part

This section teaches how to add an Action to a View's MenuBar similar to ViewActions extnpt.

1. Open Application.e4xmi and select the Part on which we need to add an Action
2. Select Menus, Right Click and select Add Child > View Menu
3. Provide a Label and ID for the newly created View Menu
4. Right Click on the View Menu > Add Child > Direct MenuItem
 - Assign ID, Label, Tooltip etc
 - Create a Class by clicking on the Class URI HyperLink
 - Update the execute method with the desired Action
5. Run the e4 Application and You should now get your View with a Menu
